

RULES PERTAINING TO THE GROUNDS IN _____ CEMETERY

_____ Cemetery has a significant historical background in _____ County and we are proud of this background. While we have no full time caretaker, The _____ Cemetery Association attempts to maintain the cemetery appropriately by mowing the grass and periodically trimming the trees and bushes.

To make our care of _____ Cemetery easier for us to handle, and to contribute to the desirable overall appearance of the cemetery, _____ Cemetery Association adopts these rules:

1. When erecting headstones they should be _____.
2. The planting of trees, bushes and flowers is not permitted. The planting of grass, such as St. Augustine, is permitted. However, _____ Cemetery Association assumes no responsibility for the watering of planted grass. It will be mowed when and as the entire cemetery is mowed.
3. Interested parties are permitted to attend gravesites by watering and trimming and the placing of flowers in receptacles. The _____ Cemetery Association assumes no responsibility should flower receptacles and their contents be lost, turned over, broken or removed. Empty receptacles should be removed from gravesite except where they are a part of the headstone arrangement.
4. When ordering the erection of a headstone, it is strongly recommended that the monument company install a reinforced concrete below-ground base foundation. Without a proper and substantial foundation headstones over time become unstable and may topple over. The time to prevent this occurrence is when initially contracting with a monument company.
